

【Press Release】  
Taipei, August 21, 2023

## Check out TITAS 2023 Intelligent Manufacturing Online Show!

TITAS 2023 launches 4 online shows featuring “Sustainability, Functional Applications, Intelligent Manufacturing and Trend Zone”. The latest theme, “Intelligent Manufacturing” will be launched on August 21, showcasing textile machinery, sewing equipment, digital printing machines, laboratory testing, measuring equipment, software and automation for design, data monitoring, processing and integrated production from TITAS exhibitors.

The application of digital technologies such as sensors, IoT devices, Cloud Computing, Big Data analysis, and Artificial Intelligence can help enterprises in the manufacturing process to effectively improve energy efficiency, reduce energy consumption, reduce carbon emissions, and measure carbon emission performance of the supply chain. On the other hands, the implementation of intelligent manufacturing not only can support short lead time orders and low-volume high-mix manufacturing but also allow textile companies to enjoy benefits of greater on-time delivery, lower inventory costs, and increased flexibility.

This Intelligent Manufacturing Online Show will showcase TITAS exhibitors’ selected products from August 21 to September 27 and the product scope will include:

- Automated textile machinery and sewing equipment.
- All kinds of software for textile development, garment processing and 3D fashion design and development, etc.

To check out the Online Show, please visit TITAS website (<https://www.titas.tw/Catalog/en-us/Home>). Register as a visitor or for more information, please contact us by email: [titas@textiles.org.tw](mailto:titas@textiles.org.tw).
