SUNMOR: Hyper Ventilated UV Blocker

SUNMOR is a game-changing fabric that provides UPF 50+ UV blocking ability with great ventilation, moisture-wicking and anti-odor abilities.

TITAS 2019 Erictex presents –SUNMOR, a multifunctional UV blocking fabric. It protects skin from 98% of the sun's harmful rays and blocks out 75% of infrared radiation by utilizing special yarn and structure. This sun-blocking ability not only helps prevent skin damage and aging but regulates body temperature. Moreover, it's permanent.

Air ventilation is the key to comfort. That's why SUNMOR is lightweight and offers air permeability >200CFM and unidirectional moisture transport. Through certified inspections, SUNMOR qualifies a smart solution to moisture management and has top quality moisture-wicking performance. Furthermore, SUNMOR's anti-odor technology stops 99% of odor-causing bacteria. It is way easier and more efficient to wear SUNMOR than it is to use sunscreen. Last but not least, they ensure a premium soft feel and have every color available.

TITAS 2019 Erictex is proudly to present SUNMOR as well as other comfortable, strong yet functional fabric in both knitting and weaving. They provides recycled fishing nets and waste fiber fabric to support sustainable design, also offers themes like Ultra Light, Comfort Zone, Free Movement.
