SHIMA SEIKI

KNITify the World – Smart Solutions in Textiles

SHIMA SEIKI MFG founded on the development of the world's fully automated glove knitting machine, they have continuously challenged them to develop innovative technology under their corporate motto ever onward.

Based on SHIMA SEIKI's pioneering flat knitting machine technology, WHOLEGARMENT® is the world's seam-free knitwear. Each WHOLEGARMENT® product is knit in three dimensions in one entire piece, meaning customers can enjoy a range of benefits like never before.

SDS-ONE® APEX4 design system which offers complete solutions in design and programming, realizes 3D virtual simulations at high speed and in high resolution.

They sincerely invite you to SHIMA SEIKI booth, and hoping everyone can have a great experience during the Exhibition.
