Patented TPU-SEAL waterproof zipper

Catch lightweight fashion trend, and favored by brands by cost-effective product

Benefiting from the recovery of market demand, the patented TPU-SEAL waterproof zipper seizes the current lightweight demands of the outdoor sports goods market, and replaces the existing traditional film water-repellent zipper with strength such like light water pressure, environmental protection, high texture, fashion and favorable price; being the new favorite of outdoor waterproof sports goods.

Moreover, TPU waterproof layer can simplify welding process and lower the cost; this special item can upgrade the garment to a craft level which garment industry can't reach originally.

The following items and their applications will be exhibited:

T Two-tone color patented TPU-SEAL waterproof zipper

T1 Solid color TPU-SEAL waterproof zipper

TM1F fabric-like patented TPU-SEAL waterproof zipper

R patented TPU-SEAL water-repellent zipper

Patented non-adhesive self-sticky fabric

The best carrier upgrading original products effortlessly

Beyond the limitations of traditional textile fasteners, the two highlights of the patented non-adhesive self-sticky fabric are its delicate hand feel and high shear strength; in recent years, due to the success of R &D and market development, the demand has exploded since 2021, and it has gradually become a new material of protective gear and

accessories, and being the best carrier to reflect the performance of various existing textile materials and improve user comfort.

This fabric is made of regular synthetic fibers like the size of cotton' s to perform the sticky function as HOOK & LOOP fastener does. Full range of sticky fabric items performing very strong sticky power with soft hand feel, applying widely in daily life, medical, outdoor, sport, baby accessories and military field.

The following items and their applications will be exhibited:

Performing very strong sticky power with soft hand feel

Applying widely used in various fields such as daily life
