

NANPAO RESINS CHEMICAL CO., LTD.

CIRCULAR ECONOMY · INCLUSIVE CULTURE · LOW CARBON MISSION · VALUE CO-CREATION

NANPAO RESINS ran this business in the country 60 years ago and has grown into an international enterprise with numerous branches. The company has supported the growth of employees and their families, believing that society is like the earth to nourish and grow the company. NANPAO RESINS started to implement the ESG policy in 2021. Investing in various resources, including management of water, waste, and recycling materials, additionally and executing energy saving, carbon reduction, renewable energy use, and low carbon emission plans. By creating better products for the environment and society and lowering the impact on the environment, we integrate eco-friendly and sustainable actions into clothing, industrial textiles, and people's daily lives.

This year, we display various kinds of non-toxic chemicals:

1. PUR for textile lamination: wide product diversity, eco-friendly, and customized.
2. PUD for textile coating: great physical properties. It applies to bags with water resistance, apparel with waterproof and breathability, wind-proof, rain-proof, and down-proof applications.
3. Fluoro-free water repellent: excellent anti-siphon performance and soft touch. It is appropriate for water-repellent treatment for apparel fabric or footwear fabric.
4. Others: customized to develop eco-friendly textile with stiff treatment, bonding strength and color fastness enhancement, curtain application, etc...

Moreover, we developed a series of polyols made from renewable materials to provide research energy for biomass, biodegradable, carbon-negative, and bottle-recycled products. Make resin products more sustainable and durable, and bring excellent performance.

NANPAO RESINS sincere invite your visit on TITAS 2022.
