Playing your Edge, High bonding and Comfortable

San fang LSCHYS® elastic and high-recovery series of adhesive film are the most suitable for functional clothing and any underwear. It's an excellent replacement for elastics and bulky stitches for optimal stretch and recovery, maintains a smooth silhouette for bonded seams or hem.

Great Bonding Solutions for Woven

San Fang LSCHYS®-W series is best at bonding solution for woven fabrics, difficult-to-stick fabrics. We provide strong adhesion without any peeling. We also offer high /and low temperature processing for fabrics of various grams.

Amazing Seam Tape – Good Resistance Water

The advantage of San fang LSCHYS®-MME070 and MS 700 can achieve fashion, water resistance and perfect functional clothes according to your different colors and needs.

Your Style, Your Decorate!

San Fang LSCHYS®-D series provides you with the most fashionable needs, not only in personalized LOGO, pockets, support, and anti-slip decorative effects to give you more than a variety of options (pearl, chameleon, rainbow, reflective, etc..)

More Breathable, Plus Light weights

San Fang' s aerofilm series is a revolutionary breakthrough that changes the structure of film. In addition to high adhesion, it also has the characteristics of breathability and weight reduction. aerofilm is not only suitable for bonding and decoration on underwear, leg wraps, rear-lifting pants, or any functional clothing.

PoreForte[®]

Water Resistance plus Breathable, We are PoreForte!

Sustainability and eco-friendly continues to be the main target for the apparel industry. San Fang do care, and we have PoreForte for you. PoreForte uses rPET material, which fits recycling idea with comfort for your clothing.
