

## CHANCE LINE INDUSTRIAL CO., LTD. Step by step

Chance Line was established in 2004, and rooted in Taiwan for nearly 20 years. The product line started from plastic caviar beads, stretching to artificial leather, packaging materials, various types of heat transfer vinyl, coating and lamination, and applications in various fields including textiles, leather, film, stamps, labels, special paper, electronic protective film. Our sales market is mainly in Europe and the U.S.

ECO-HTP® is our new digital printing heat transfer technology, which is in line with current sustainability, environmental protection, and carbon emission reduction issues. ECO-HTP® uses environmentally friendly water-based PU to produce heat transfer products with high elasticity, high stability, water repellency, and without VOC emission. It can be applied to clothing, LOGO, washing labels, shoe uppers, webbing, etc. Chance Line is a company in Taiwan with continuous innovation and strong research and development capabilities.

Our vision is to “become one of the world's high-quality material suppliers” , implementing scientific management, serving society, constantly improving product quality and operating environment, enhancing employee benefits, and adhering to the concept of "step by step, and never stop thriving.
