

Taiwan Paiho Limited

Bringing Imagination to The Future of Textiles.

PAIHO continually brings functional and qualified textile materials with its innovative mindset from the perspective of an artist and engineer. PAIHO integrates experience in textiles and converting services to provide diversified and brilliant solutions for apparel, footwear, and related industries.

We also introduce biodegradable mushroom hook RCS certificated re-molded hook as sustainable closure solution. PAIHO is dedicated to producing and optimizing sustainable products to meet our customers' expectations and protect our environment.

As a trim manufacturer, PAIHO and its Material Hub platform are expected to shorten the workflow by integrating virtual and physical resources and making the innovation and development process more effective and intuitive. The platform's purpose is to eliminate the communication limitation of space and locations and provide appropriate and relative solutions by summarizing thousands of material application development and simplifying the introduction of human and material resources among company profiles, materials, catalogs, and application of materials.
