

## Sheng Shung Fiber Co., Ltd.

### Functionals fabrics to your Comfy Casual lifestyle

Sheng Shung Fiber Co., Ltd. is a professional supplier of functional woven and knitted fabrics, with the goal of development & innovation, and concern the Environmental Friendly issue is a worldwide value, adhering to more than 30 years of manufacturing and production experience, we have realized the "4F" functional fabrics of Functional, Fashionable, Friendly, Future, to provide a variety of Fashionable, Recycled-Environmentally-Friendly materials, high-quality fabrics for making Casual wear, Mountaineering wear, Outdoor Activity wear and Sportswear for Brands and apparel industries, to create your own comfortable and refreshing leisure lifestyle.

We manufacture High-Performance Knitted and Woven fabrics:

#### ① Wear Resistant Fabric

Wear-resistant fabric is made from high-tenacity, high-strength, abrasion-resistant nylon yarn. It has super wear resistance, good tensile strength, high resistance, good tearing and tensile strength. It provides long-lasting durability coupled with natural softness to help it from outdoor casual wear to professional high-tech clothing, it can show its excellent wear-resistance, anti-pilling TECHNOLOGY excellence.

#### ② Graphene Fiber Fabric

Unique Graphene Fibers of new material, it has the appeal of "health", because its graphene material can release far-infrared-rays to promote blood circulation, and has excellent heat storage and heat preservation; The negative ions released can reduce static electricity and have antibacterial and deodorizing functions, that bringing you a "HEALTHY" and "constant temperature and comfortable" life.

#### ③ Cooling Yarn Fabric

Our nylon cooling fabric is based on the textile material with good water absorption and the principle of hydrophilic cool feeling, and uses the function of moisture absorption and perspiration to achieve a cool feeling. Its excellent high moisture absorption & high moisture release function brings

moderate moisture regain, so as to increase moisture absorption & cool feeling, let the body feel a cool feeling of humidity, and quickly evaporate water under the appropriate moisture condition to achieve cool feeling, comfortable effect, to bring you a COMFORT life.

#### ④ 抗菌除臭布

The impact of the COVID-19 pandemic has made us think about the importance of anti-bacterial, but because of the complexity of various bacterial species, this is a complicated issue and it is also a specialized field knowledge; In the post-epidemic era of COVID-19, we try our best to do our best in the textile industry to produce strong anti-bacterial and deodorizing fabrics. The wash-ability and long-lasting properties of the chemical are the key points and that's also our INTENTION.

#### ⑤ 萊卡® LYCRA 彈性布

Stretch fabrics can improve the body-fit & comfort of garment, innovate people's dressing habits, and it is also a clothing trend. LYCRA® elastic fiber, with its excellent quality, endows clothes with excellent elasticity, long-lasting shape, and comfortable fit, allowing the clothes to move with you, and that is deeply loved by buyers. To choose it because of for its excellent quality of elasticity and the comfort, and it delivers for the all types of apparel, is more a TRUST.

Sheng Shung Fiber Co., Ltd. takes development and innovation as the central goal, and produce a variety of fabrics with the 4F spirit of Functional · Fashionable · Friendly · Future. And then, it reflects to serve customers with functional fabrics of TECHNOLOGY · HEALTH · COMFORT · INTENTION and TRUST.
