

## A Plus Chan Chia Co., Ltd.

### A Fabric Magician - Biomass Environmental Technology

**A** Fabric magician – A Plus Chan Chia. Through construction designs, we make spandex free fabrics with mechanical stretch, we also can put more than 55% spandex in fabric, to make it hardly be stretched. Knit fabric is woven like or vice versa. Non-peached fabric is with peached hand feel to save cost and energy. Playful color schemes, we combine blue and yellow yarn to have green represent in fabric.

We do not follow up main-stream trend. Insisting and focusing on variety developments, there is no limit in what kinds of categories, we do woven, warp knit, circular knit, brushed, peached, pile fabric. “Variety” and “Specialized” are the core value of our company, to take strategy of diversification to satisfy buyers’ or consumers’ diverse requirements.

Since 1999, the founder, Mr. Chen, has independently developed double-sided high-elastic knitted fabrics, which fully demonstrates the richness and high resilience of the fabric. It is favored by many international brands and is well-known internationally.

In two and a half years, we successfully developed a new generation of 100% bio-based environmentally friendly fabrics made of castor oil-derived bio-nylon 11 (PA11). In addition, we use membrane and water-repellent technology to make lamination fabric, which are suitable for outdoor textiles. Therefore, it has attracted cooperation from famous French fashion brands and outdoor brands.

On top of that, we are willing to do more for the earth. To design the apparel can be recyclable or reused after used and have zero landfill waste. Meanwhile, to have durability property is one of essential elements in our production line as well.
