

Giant Knitting Go., Ltd.

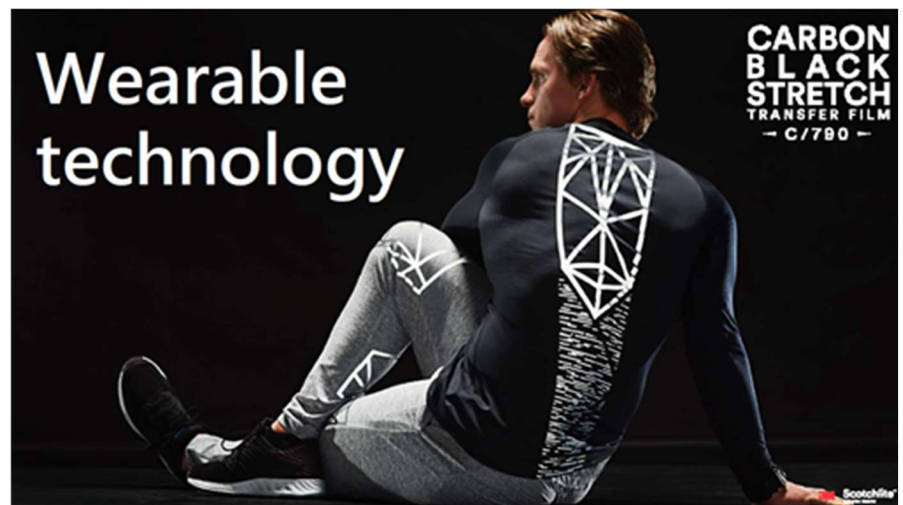

Reflective technology elements have become the navigator and guardian of the dim and dark world.

Working together · we can be stronger!

Giant Knitting Co., Ltd. is authorized distributor/converter of 3M™ Scotchlite™ Reflective Material and Thinsulate™ Insulation Material. At Taipei TITAS · we will bring developers and designers favorite basic reflective technological materials such as sports and outdoor clothing · footwear and accessories · and also respond to the concept of today's green products and environmental protection trends · to promote and present more diversified product line applications this year. Basic reflective elements are matched with various substrates or various composite materials · plus colorful color changes · customized products · and create more rich and infinite extension possibilities for your products!

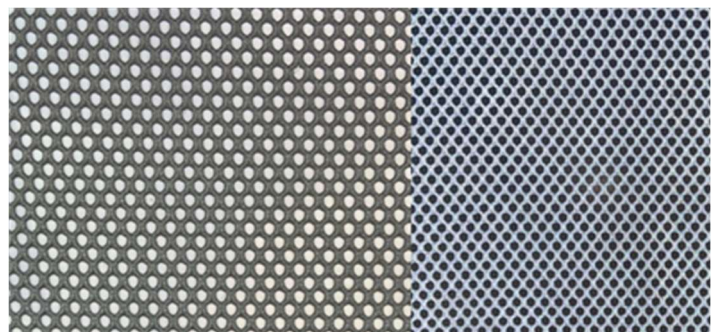

3M Patented C790 Carbon Black Stretchy Transfer Film.

In the daytime · it is dark black · which makes people feel calm; after being illuminated by lights at night · it shows lively and reflective brightness · which makes people feel safe! The material has excellent durability · and high stretch elasticity · and is also suitable for laminated on various fabrics.

GK Patented R.S.W. Reflective Spider Web.

The reflective film of various colors is matched with recycled and environmentally friendly fabrics or mesh fabrics · which have penetrating · thin · and multi-wide-angle reflective visual effects · allowing the product to increase its toughness and vitality.

GK Patented 3M Diversity series.
Diversified product lines · such as customized transfer logos · tapes and badges which have a metallic outstanding outlook. It could be combined with an environmentally friendly plain-woven fabric base · UV-sensitive and Thermo-react functions could also be added.
