Huan Shen Enterprise Co., Ltd

## Huan Shen Enterprise Co., Ltd. **Sports & Health & Safety**

**H**uan Sheng Enterprise Co., Ltd. is promoting a sock collection this year made from a cooling and deodorizing cotton material. The deodorizing cotton is a patented Taiwanese innovation that effectively eliminates odors and addresses the issue of heat retention caused by traditional bamboo charcoal, making it cooler than bamboo charcoal yarn. It is a new material specifically developed for Taiwan's hot and humid weather, and it possesses powerful deodorizing capabilities, even after being washed 20 times. These socks, including workout socks, yoga socks, and cycling socks made from this deodorizing cotton, will be showcased at the Taipei Textile Exhibition in 2023.

Health is our main focus this year, and in addition to the sports range, we also offer health-conductive socks. These anti-static socks are woven with conductive wires and can be paired with health-grounding shoes to eliminate static electricity from the body. We also have laboratory-grade discharge socks designed for various hazardous environments such as oil and gas facilities and explosive powder laboratories. These socks will also be exhibited at the Taipei Textile Exhibition in 2023. For more information, please visit our website <https://huanshensss.com.tw/> ◦
