

## MICROTEK INTERNATIONAL, INC.

### Textile Defect Inspection Solution The Smart Manufacturing Quality Choice

**M**icrotek, a prominent provider of image capture and scanning technology in Taiwan, brings years of expertise in the field of industrial smart manufacturing. We are excited to present our latest Textile Defect Inspection Solution at the "2023 TITAS" event, taking place from October 17th to 19th.

Microtek's "Textile Defect Inspection Equipment" offers a convenient solution for detecting defects, easily installable onto weaving machines. The system integrates a high-resolution color line-scan imaging module, capturing clear and intricate images of the woven fabric. Furthermore, through intelligent image processing software, it swiftly categorizes and matches defects within the woven fabric, accurately indicating their locations.

With Microtek's "Textile Defect Inspection Equipment," you can efficiently identify defects in woven fabrics, significantly reducing the costs associated with manual visual checks, misjudgments, and low efficiency issues. This results in an enhancement of manufacturing productivity and product quality. Additionally, the competitive pricing of Microtek's "Textile Defect Inspection Equipment" positions it as an unrivaled choice.

We warmly invite both experienced professionals and newcomers to explore and collaborate with us. Allow Microtek to create an exclusive quality inspection solution tailored for you.

**Image Capturing System in High-Speed**
