

**GRAND TEXTILE CO., LTD**

*We don't just make, We create*

## Grand Textile Co., Ltd

*We don't just make, we create!*

**G**rand Textile was founded in 1987. We are one of the synthetic fabric suppliers that are capable of producing both knits and woven fabrics. The certification we have includes bluesign, GRS and HIGG FEM index.

We have two facilities located in Taiwan and Vietnam. We cover all the production chain from weaving/knitting to different kinds of post-finishes.

With almost forty years of experience, we obtained several patents for our innovations. This includes:

- Stone Cold® (Cooling Technology)
- Coffee Charcoal® (Thermal regulation)
- Color Max (Dyeing technique creating spray dye/tie dye effect)
- Triple-dye-in-one-bath

We also focus on sustainability as we know that textile industry is generating great amount of pollution in the world. Therefore, one of our biggest achievements is Zero Discharge of Wastewater. We aim to achieve a close loop of water system on site by reusing wastewater into the production. By end of 2023, we will complete the installation of rooftop solar system that is able to support 50% of total electricity consumption.

On another hand, we invest machines and technologies that relate to sustainability in production area.

- Low bath ratio dyeing machine
- Direct digital printing machine
- TPEE membrane
- Water-based PU coating

We look forward to seeing you at the 2023 TITAS Show!
