## TUNG HO

### Functional Spun Yarns and Filaments

Established 66 years ago, Tung Ho specializes in development and production of functional spun yarns and filaments. Their R&D Center was founded in 2019 to advance the development of higher pilling fibers, mixed woven yarns, compound blended yarns, and superfine high count yarns.

For TITAS 2019, Tung Ho presents its functional yarns that with natural tenacity, excellent touch, low hairiness, and single dye polychromatic yarns. Their main products include general fiber products, drirelease, compound functional, SIRO, and Sustainability series. Among these, drirelease, compound functional, SIRO and Sustainable yarns are their focus product lines.
